New Vehicle Controls to be Installed on Core Campus Walkways

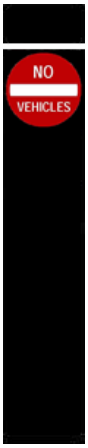
Based on recommendation of the UNH Traffic Safety Committee, Energy & Campus Development has scheduled a mid-August installation of traffic control bollards to deter unauthorized vehicles from driving on core campus Ways, sidewalks and paths. Bollards will prohibit vehicle traffic between:

1. Thompson and Murkland Halls
2. Conant Courtyard and Academic Way
3. Academic Way and McDaniel Drive
4. Morse Circle and College Road

Red lines on the map indicate walkways being closed to vehicles. Bollards are collapsible to permit designated emergency vehicle passage. All approved loading areas, service spaces, ADA parking and vehicle travel ways remain accessible.

Loading in front of the Dimond Library and in Murkland courtyard is no longer permitted.

This installation is part of an ongoing effort to reinforce the walking campus, protect pedestrian safety and maintain our fragile campus landscape.

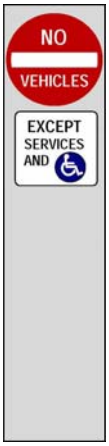


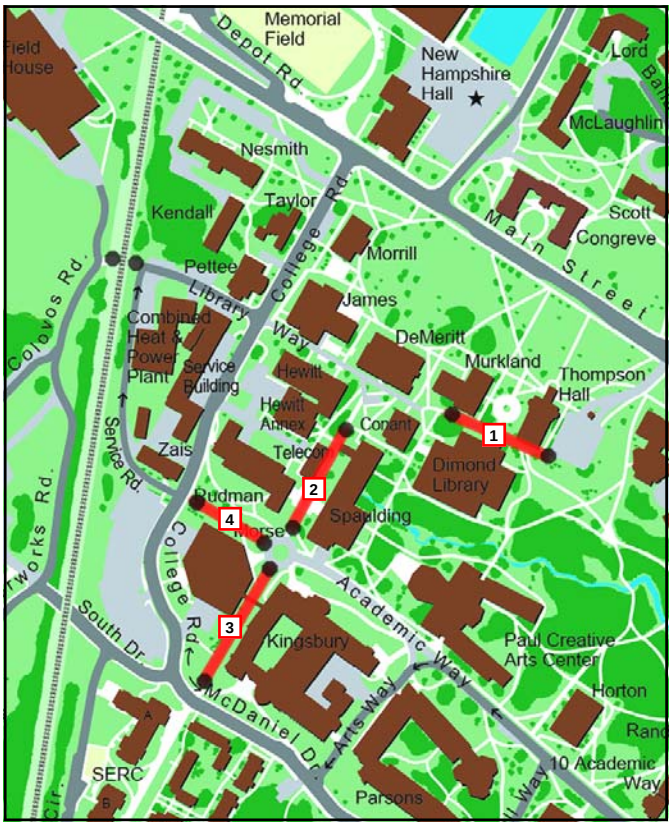
Vehicles Prohibited

Bollards will display regulatory signs designating corridors where non-emergency vehicles are strictly prohibited. *Violations are subject to fine.*

Vehicles Restricted

Other corridors and walks on campus will feature newly posted regulatory signs noting restrictions of vehicles. This includes Library Way from College Road to Conant Hall.





These new prohibitions and restrictions will be enforced on all non-emergency vehicles (including UNH vehicles) by UNH Police and Parking Services

General "Rules of the Non-Road" at UNH:

- UNH is a walking campus with limited vehicle access. Our first priority is to protect pedestrians and bicyclists - who always have the right-of-way on core campus.
- Safety trumps convenience. Courtesy is required by all.
- Loading docks and service spaces at buildings are the only permitted access points for UNH service and commercial delivery vehicles, barring emergencies.
- On core campus, not all buildings are directly accessible by vehicles. Deliveries must be off-loaded at marked loading areas and moved with a hand-truck or cart.
- Unattended vehicles in a Fire Lane are never permitted.
- Vehicles are expected to drive on roads and not take shortcuts over walking paths or landscaped areas.
- UNH Police and Transportation Services enforce all parking and traffic rules and will issue violations to drivers.
- Vehicles and equipment involved in maintaining exterior utilities, grounds maintenance and other outside work are exempt.

Vehicle access to restricted corridors may be granted by UNH Police. Contact them for permit and to arrange access.

Questions regarding delivery routes and access can be emailed to stephen.pesci@unh.edu.
