

## Dry Ice Shipping Label

Do not use this label unless you are certified to ship dry ice. For details, refer to the UNH Guide to Shipping with Dry Ice.

The label below should print to the proper dimensions of a class 9 hazard label (minimum dimension to side a side: 100 mm). Cut around the outside border of the label and affix it to a vertical side of the box (not the top or bottom), oriented as shown below. Many printer inks run when exposed to even small amounts of water, such as rain or snow. Therefore, when using this label, cover with clear plastic tape after filling in the weight of dry ice.
