

## **Search for Unpublished Studies for a Meta-Analysis of Emotional Intelligence**

I am a graduate student at the Chinese University of Hong Kong. I am conducting a meta-analysis of emotional intelligence (EI) in the workplace for my master thesis under the supervision of Prof. Darius Chan. I am writing to ask for your assistance in locating any unpublished research.

My study is expected to contribute to the EI field by clarifying the relationship of EI and various work outcomes as previous meta-analyses have focused on EI's predictive validity (Van Rooy & Viswesvaran, 2004) and health (Schutte et al., 2007).

Studies that fit my study would include the following:

- conducted in work samples;
- correlational research methodology (with correlational matrix);
- a measure of EI (ability model or mixed model);
- a measure of work outcome (job performance; job satisfaction; organizational commitment; organizational citizenship behavior; transformational leadership; transactional leadership, or leadership effectiveness).

To have the more accurate result and reduce the publication bias, I would greatly appreciate it if you could send me a copy of (email or hard copy) any related unpublished research articles, thesis, working papers and conference papers. These may be ones that you personally have written, or ones written by a fellow colleague. It will be great if you could send me your work on or before 30 April 2009.

Thank you very much for your help in advance. I can be reached by email or the address below.

Best Regards,

Tony Cheng
