

Environmental Engineering and Science Spring Seminar Series

Fridays, 12:00 - 1:00
320 Gregg Hall

- February 1st **Your Grandmother Was Right: It Is Better Together!**
Mr. Lewis Feldstein, New Hampshire Charitable Foundation
- February 8th **Imminent and Substantial Endangerment: "Lead" Astray by the EPA**
Dr. Marc Edwards, Department of Civil and Environmental Engineering, Virginia Tech
- February 22th **Environmentally-Relevant Forms of the Prion Protein**
Dr. Shannon Bartelt-Hunt, Department of Environmental Engineering, University of Nebraska – Lincoln
- February 29th **Locating Vernal Pools using Statistical and Spatial Modeling**
Dr. Russ Congalton, Department of Natural Resources, UNH
- March 7th **Fiber Optic Distributed Temperature Sensing: Theory and Environmental Applications**
Dr. Jennifer Jacobs, Department of Civil Engineering, UNH
- March 13th **Deliberative Valuation and Environmental Management**
Dr. Richard Howarth, Department of Environmental Studies, Dartmouth College
- March 28th **Characteristic Reaction Length: A New Paradigm for the Design of Granular Media Filters**
Dr. Desmond Lawler, Department of Civil Engineering, University of Texas – Austin
- April 11th **TBA**
(Gregg 110) *Dr. Scott Summers, Department of Civil Engineering, University of Colorado - Boulder*
- April 18th **Stormwater BMP Performance in North Carolina**
Dr. Bill Hunt Assistant, Biological and Agricultural Engineering, Urban Stormwater Management, North Carolina State University
- April 25th **Elements of Successful Implementation of Low Impact Development (LID) Techniques**
(King N121) *Dr. Richard Claytor, Horsley Witten Group*
- May 2nd **TBA**
Dr. Margaret Greenslade, Department of Chemistry, UNH
- May 9th **Systems Approach to Subsurface Bioremediation and Conversion of Organic Wastes to Electricity with Geobacter**
Dr. Derek Lovley, Department of Microbiology, University of Massachusetts - Amherst

Lunch will be served.
