*Thank you for your continued support !!*

Our mission is to conceive, design, fabricate and compete a scaled formula-style race car. The current racecar (#39) is still in development, but come check out last year's vehicle, in its finished state!

With major sponsors of GM, Ford Motor Company, and the Society of Automotive Engineering, the Formula SAE event is a proving ground for aspiring engineers in the automotive industry.

These cars are engineered and built to exceed the capabilities of any production car; 0-60mph accelerations are as low as 3 seconds with lateral accelerations nearing 1.4g's.

With your support we can unleash the potential of the new UNH Formula SAE team.
