

### *2008 Fall Banquet*

UNH Precision Racing held its annual Fall Banquet Fundraiser December 14<sup>th</sup>, 2008. Despite the ice storm, which left much of the state without power, the event had a great turnout. Sponsors, friends and family all came to the Memorial Union Building on the UNH campus to support the team. In addition to the dinner and presentation explaining what the team is working on and proposes to build over the next few months, the team held a 50/50 raffle and sold t-shirts to raise funds.

### *Tucker Engineering*

In mid-January, the team visited Tucker Engineering in Peabody, MA. Tucker Engineering is a custom machine shop specializing in heat sinks and has been a valued sponsor of the UNH Precision Racing team for the past several years. Mr. Tucker gave the team a tour of his manufacturing facility and had a lot of valuable advice to offer the team both about engineering and running a business.

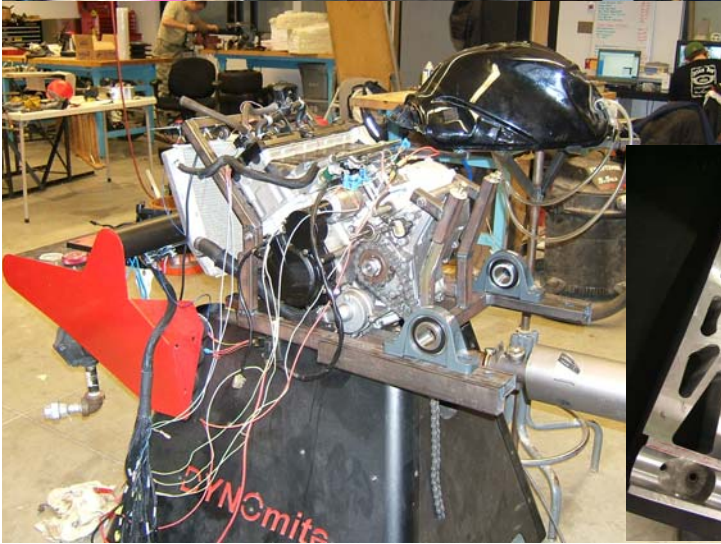

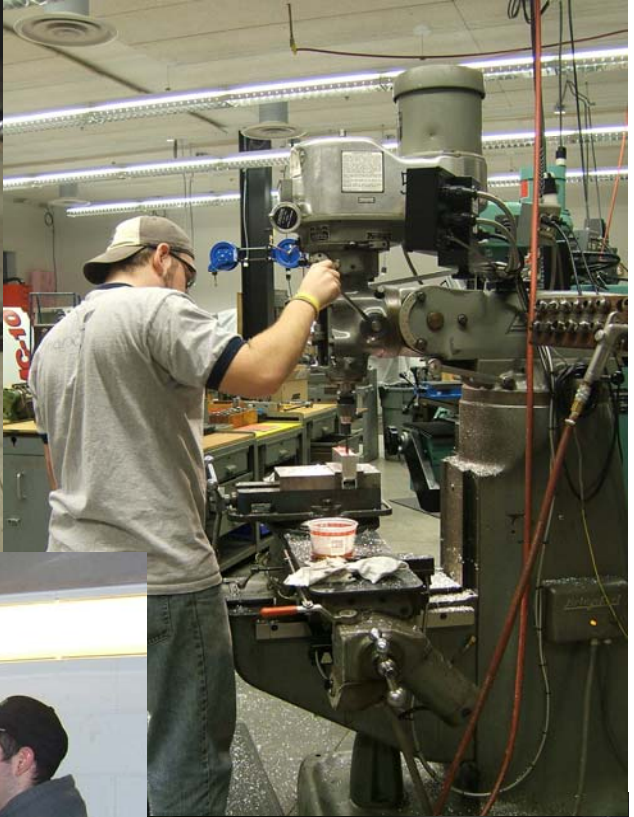

### *Fabrication and Progress*

Classes are now back in session and UNH Precision Racing has returned

from winter break. A lot has been going on in the shop lately. With the Feb 28<sup>th</sup> deadline for a rolling chassis fast approaching, the car is taking shape. The frame is almost complete with only a few suspension and steering mounts remaining. Many of the critical components have been CNC'd from aluminum blocks including the uprights, bell cranks, hubs, bearing blocks, and pedal assembly. Much of the suspension and drivetrain is complete and the engine is being tuned on the dyno. Since the front webbing of the frame is done, the body molds are coming along nicely.

### *New Website*

For more pictures and updates about the team, visit our website at [www.unh.edu/fsae](http://www.unh.edu/fsae). It has recently been updated to include several photo albums from last season as well as the events and progress from this season. Check out the team's history, car overview and previous competition results and get to know this year's seniors on the new team member page. Visit our sponsor page the see all the people that continue to make a project like this possible. Thank you sponsors!
