Please listen carefully to this important safety information to assist you in exiting the building in the event of an emergency.

In the event of an alarm, everyone is required to evacuate the building. Please use all available exits. There are three emergency exits in this room, in addition to the door you entered. (Point them out.) You cannot remain on the exterior balconies. Please proceed to ground level. Please take a moment now to locate the exits.

Guests with mobility concerns who cannot use stairs, should exit into the hallway and proceed straight, past the elevator, past the mailboxes and into Holloway Commons. This is the accessible exit route.

After evacuating, you may hear the audible alarm stop. Do not re-enter. The building is hot safe to enter until the flashing strobes located throughout the building have stopped flashing. Only then is the building cleared to enter.

In the event of an evacuation, this event will resume as soon as possible.

Thank you.
