

CHANGING CAMPUS CULTURE

- Use incidents involving alcohol and other drugs as teachable moments.
- Share your thoughts about the high-risk use of alcohol and other drugs and encourage others to discuss the issue.
- When appropriate, incorporate alcohol and other drug related issues into the curriculum. (The Office of Health Education and Promotion, Health Services, is willing and able to assist faculty members with curriculum infusion.)
- Monitor personal language and examples.
- Work with and support campus efforts to prevent the high-risk use of alcohol.
