

2022-2023 ANNUAL GIVING REPORT

# YOUR GENEROSITY POWERS UNH TRADITIONS

University of  
New Hampshire

# GENEROSITY

It's one of our proudest UNH traditions. Every day, across our campus and community, donor generosity changes lives and connects individuals to the catalyst of a UNH education. Here are just some incredible examples of the difference your generosity makes across the entire UNH experience, from the classroom to the athletic field, the first internship to the first breakthrough. Generation after generation, donors like you ignite possibility for the Wildcats of today and tomorrow.

## TOTAL DONORS

**24,574**

## DONOR CONSTITUENCIES

Alumni  
**10,018**

Friends  
**8,257**

Parents  
**3,849**

Faculty & Staff  
**780**

Students  
**838**

Corporations  
& Foundations  
**832**

**12,791**

Supporters Rose To The (603)  
Challenge from April 2-6, 2023  
and Gave \$3,000,873

**8,813**

Supporters Made  
Their First Gift Ever

**447**

Members of the Class of 2023  
Participated in their Senior  
Class Gift

## Total Commitments

**\$61,184,229**

## Average Gift Received

**\$1,421**

## Gifts Less Than \$100

**52%**

## Average Donor-Funded Scholarship Award

**\$3,184**

## Total Number of Funds Supported

**940**

## Top Areas Supported

*(Based on Number of Donors)*

- 1 Athletics
- 2 Scholarships/Student Support
- 3 College of Liberal Arts
- 4 College of Health & Human Services
- 5 College of Engineering & Physical Sciences
- 6 Peter T. Paul College of Business & Economics
- 7 College of Life Sciences & Agriculture
- 8 Northeast Passage
- 9 UNH Franklin Pierce School of Law
- 10 Cooperative Extension
- 11 4-H
- 12 Shoals Marine Lab

## ATHLETICS & EXTRACURRICULAR ACTIVITIES

### THE TRADITION OF... WILDCAT EXCELLENCE

**B**etween heading to practice and running to class, it can be hard for student athletes to get the nutrition they need for peak performance and well-being. The Fueling Station, conveniently located in Lundholm Gymnasium, is the perfect solution. Wildcat athletes can stop by

pre- or post-workout for a range of free, healthy snacks developed with the expertise of UNH Sports Nutrition. There are also nutrition demonstrations to help student-athletes develop healthy habits they'll take with them for life — all fueled by the Wildcat Athletics Fund.

**Your generosity equips student-athletes with the resources they need to be unstoppable – and empowers Wildcats to connect, grow and lead outside the classroom.**

Four D1 Wildcat athletics teams cinched conference titles in the postseason this year without having to worry about the costs of additional travel.

Club sport athletes showcased their Wildcat pride with the purchase of new uniforms and competed in 17 states.

Graduate students in the Peter T. Paul College of Business and Economics enjoyed robust community-building programming and networking opportunities, from monthly lunches to trivia nights.

**Your generosity allows more students, regardless of their financial background, to pursue the experiences they need to lead.**

Twelve health management and policy students attended the Northern New England chapter of the Healthcare Financial Management Association annual conference, where they gained important industry connections and new capacity to address pressing issues facing the health care field.

The Peter T. Paul College of Business and Economics hosted its inaugural Diversity, Equity and Inclusion Conference featuring Jermaine Moore, founder of the Mars Hill Group.

Graduate students benefitted from a new professional development series focused on building communication skills — essential for translating big ideas and stepping into leadership positions — as well as enhanced research opportunities at the Shoals Marine Laboratory.

## EXPERIENTIAL LEARNING

### THE TRADITION OF... LEARNING WAY BEYOND THE CLASSROOM

**O**n a marine vessel somewhere off the coast of Homer, Alaska. In a genomics lab at Massachusetts General Hospital. At a wildlife rehabilitation center in Florida. Along the Lewis and Clark National Historic Trail. These are just some

of the places College of Life Sciences and Agriculture students have gained critical professional experience because of the SOAR fund – internship stipends that bridge the gap between dreaming and achieving.

**Your generosity connects students to a world of possibility.**

A new College of Life Sciences and Agriculture study abroad field course puts students at the center of livestock and wildlife management in Namibia.

More than 110 Wildcats traveled abroad for service projects benefitting communities in Tanzania, Nepal, Ecuador and beyond through the International Changemaker Grant, a program of UNH's signature Changemaker Collaborative.

UNH Manchester students preparing for rewarding biotech careers received financial support, unique research opportunities and professional mentorship through the Millyard Scholars program, which welcomed its most academically competitive cohort to date — with an average 4.0 GPA.

## **SCHOLARSHIPS**

### **THE TRADITION OF...**

## **WILDCATS ARRIVING ON THE GLOBAL STAGE**

**W**ith the support of the UNH community behind them, students discover that following their passions takes them extraordinary places. This summer, the student musicians of UNH's beloved 3 O'Clock Jazz Band arrived in Perugia, Italy to perform

for the Umbria Jazz Festival, where they bumped elbows with jazz greats and connected with the international music scene. Donor generosity helps to offset student travel costs for educational trips like this — and makes more world-changing journeys possible.

**Your generosity brings UNH excellence to every corner of the state and beyond.**

4-H youth traveled to the National 4-H Conference in Washington D.C., where they proudly represented their home state of New Hampshire.

Eight College of Liberal Arts students interested in sustainability and social justice spent their summers interning at local organizations, including Indonesian Community Connect, the world's first little Indonesia, and New Hampshire Humanities, a hub for cultural programming statewide.

Local youth benefitted from over 40 sled hockey opportunities provided by Northeast Passage, a leader in adaptive sports. Sled hockey is a gamechanger for individuals with disabilities interested in playing the popular ice sport.

#### IMPROVING THE COMMUNITY AROUND US

#### THE TRADITION OF...

### OPPORTUNITY MADE IN NEW HAMPSHIRE

**T**he popular Master Gardeners course helps individuals with a passion for plants bring beauty, connection and growth to their neighborhoods as ambassadors of Cooperative Extension's horticulture expertise. Philanthropic support gave UNH Extension the resources to launch a hybrid format of the course,

making it accessible to a wider range of students and helping local gardening programs bloom statewide. That means more hands-on learning for students after school. More community at the community garden. More questions answered at the farmer's market. And more growth — starting in your own backyard.

## FACILITIES AND AMENITIES

### THE TRADITION OF... UNH INNOVATION

In Kingsbury Hall — the homebase for students in the College of Engineering and Physical Sciences (CEPS)— a new Makerspace supported by the CEPS TECH fund will soon open its doors to the next generation of UNH innovators.

You don't have to talk to CEPS students for long to know

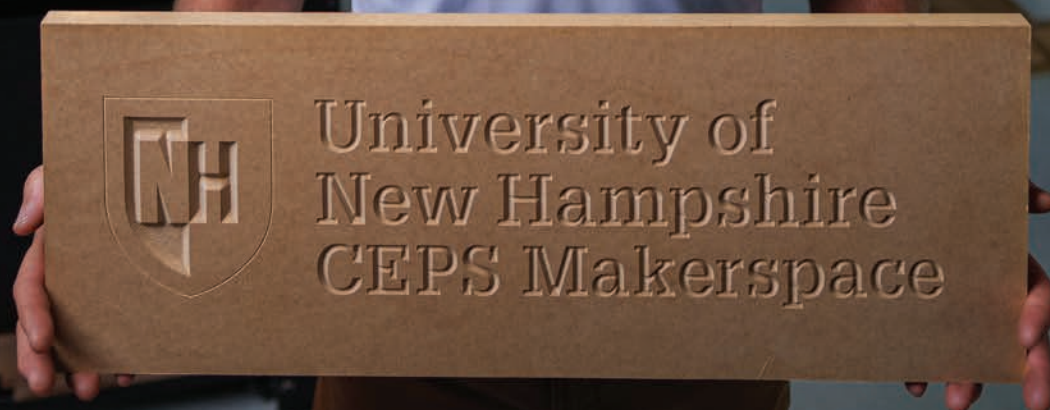

they are hands-on learners who love applying their expertise to solving problems. From greener infrastructure to smarter technology, what CEPS students build right here in the Makerspace, with state-of-the-art machinery and the support of expert faculty and staff like Kevan Carpenter '94, director of the CEPS Technical Services Center (pictured) will move the world forward.

#### **Your generosity gives students the space and tools to unlock their fullest potential.**

Students at UNH Franklin Pierce School of Law will soon call a best-in-class collaboration space in the Law Library their favorite place to work together and study.

The UNH Library purchased a new ScanPro Microfilm Reader, a powerful research tool for a range of disciplines — and students and scholars alike.

The School of Marine Science and Ocean Engineering upgraded its flagship research vessel, the R/V Gulf Challenger, which powers student study of a range of coastal ecosystems. They also made critical improvements to their Marine Research Complex and small boat fleet.
