NH International Seminar

Fall 2017

TECHNOLOGY & INNOVATION IN A GLOBALIZING WORLD

Cybersecurity: Impacts on the Nation, the World, & You

James Ramsay - Professor of Security Studies, UNH Manchester

Maeve Dion - Assistant Professor of Security Studies, UNH Manchester

Greg Falco - Co-founder NeuroMesh; Adjunct Professor, Columbia Univ.

Panel Discussion (open to all)

Tuesday, November 14th

12:40 - 2:00 pm • MUB Theater 2

Security risks abound in the modern day, and perhaps cyber risk is first among them. As a result, cybersecurity affects everyone every day. The deep partnership and dependence society has on smart devices, automated banking, ground and air traffic control, clean water, and digital information for just about every transaction we make creates enormous flexibility. But with this flexibility comes profound risk. The panel, moderated by Dr. Ramsay will discuss cyber risks to both society and the world and will welcome audience participation in the overall discussion about how cyber risks and threats affect us all.
