The Assertiveness Inventory

By Robert E. Alberti and Michael L. Emmons

The following questions will be helpful in assessing your assertiveness. Be honest in your responses. All you have to do is draw a circle around the number that describes you best. For some questions, the assertive end of the scale is at 0, for others at 3.

Key: 0 means no or never; 1 means somewhat or sometimes; 2 means usually or a good deal; and 3 means practically always or entirely.

1. When a person is highly unfair, do you call it to attention?

Totally It All Up... What Does It Mean?

When you complete the Inventory, you'll probably be tempted to add up your total score. DON'T! It really has no meaning. There is no such thing as a general quality of assertiveness. "What is assertive" must be answered in terms of the person and the situation.

The Inventory is not a standardized psychological test; the studies required to thoroughly evaluate and approve a test have not been conducted. Thus, a "total score" approach is not appropriate.

Analyzing Your Results

"Your Perfect Right- A Guide to Assertive Living" suggests the following steps for analysis of your responses to the Assertiveness Inventory:

- Look at individual events in your life, involving particular people or groups, and consider your strengths and shortcomings accordingly.
- Look at your responses to questions 1, 2, 4, 5, 6, 7, 9, 10, 11, 12, 14, 15, 16, 17, 18, 19, 21, 22, 24, 25, 27, 28, 30, and 35. These questions are oriented toward nonassertive behavior. Do your answers to these items tell you that you are rarely speaking up for yourself? Or are there perhaps some specific situations which give you trouble?
- Look at your responses to questions 3, 8, 13, 20, 23, 26, 29, 31, 32, 33, and 34. These questions are oriented towards aggressive behavior. Do your answers to these questions suggest you are pushing others around more than you realized?
