A NOTE FROM YOUR MANAGER
Welcome to Woodside, all! I am excited to have you here as I begin my second year as the Woodside Apartment Manager. My primary responsibility is to ensure that we all have a safe and respectful place to call home. Myself and the four Community Assistants (CAs) throughout the complex are here to help you connect to the Woodside and UNH community and ensure that you feel like Woodside is your home. Keep an eye out for these monthly newsletters to stay up to date with the happenings around the complex, important announcements, and Woodside policies and procedures. And please, don't ever hesitate to come by the office and visit!

With the weather getting warmer, the critters are coming back around. PLEASE do not prop open the exterior doors to your buildings, giving them a way in.

DON'T PROP OPEN THE DOORS!!

In addition, propping the doors is a violation of university housing room and board agreement which states that you, as residents, have an obligation to help create a safe living environment for those in your community.
Please make sure you close the doors to the dumpsters and compactor! We don't want little critters climbing in and getting stuck or injured. Plus it gets stinky! Close and secure the doors behind you!
Woodside is proud to be part of the UNH composting program!

The Woodside compost bin is a bright yellow trash bucket located behind the recycling dumpster. All leftover food scraps that do not contain meat or dairy can be placed in the compost!

It’s easy and saves nutrient-rich food from ending up in a landfill. Instead the food waste is taken to Kingman Farm, the University's 350-acre agronomy research facility, and broken down into rich nutrients for the soil.

If you are interested in a compost bin for your apartment, email Becky at Rebecca.wintringer@unh.edu!

Here are some tips about what is and isn’t compostable, and how to make composting manageable for you and your roommates.

---

**Compostable**
- Veggie & fruit scraps
- Crushed egg shells
- Coffee grounds & filters
- Tea leaves & tea bags
- Hay
- Grains, rice, flour, wheat products
- Flowers & plant leaves
- Small amounts of shredded paper
- Non-meat, non-dairy table scraps

**Non-Compostable**
- Meat, Fish, Dairy (these items take a LONG time to compost and they’re smelly!)
- Colored paper
- Diseased plants & flowers
- Inorganic material (plastics, metals, etc.)
- Human or animal waste
- Fats & oils
