

# Crestron Mercury AirMedia®

## Connect an Android Mobile Device via the Mercury AirMedia®

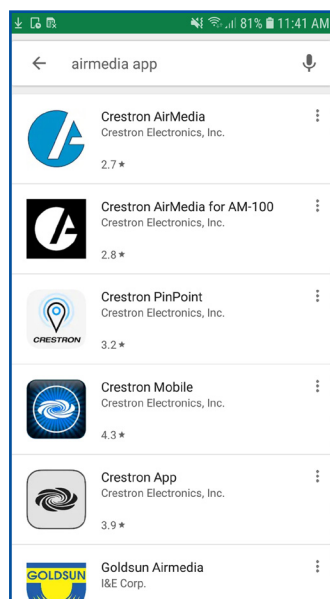

Crestron Mercury

1. Select the *Present* Icon

2. Choose AirMedia® - To present over Wireless

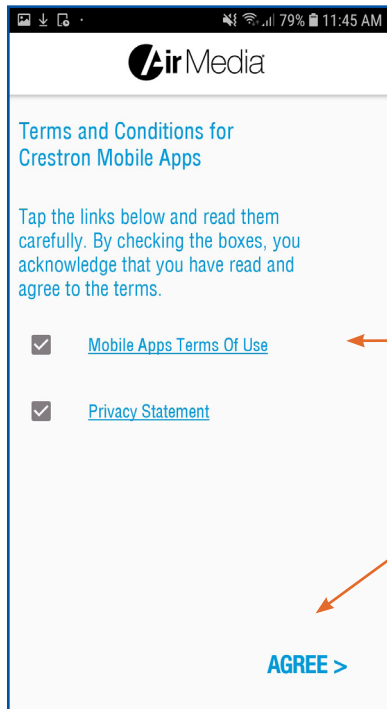

3. Choose HDMI - To present via HDMI Cable

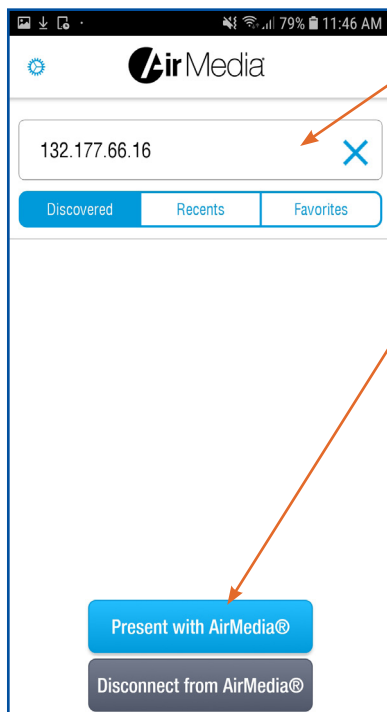

1. Open your device's application store.

2. Search '*AirMedia App*'

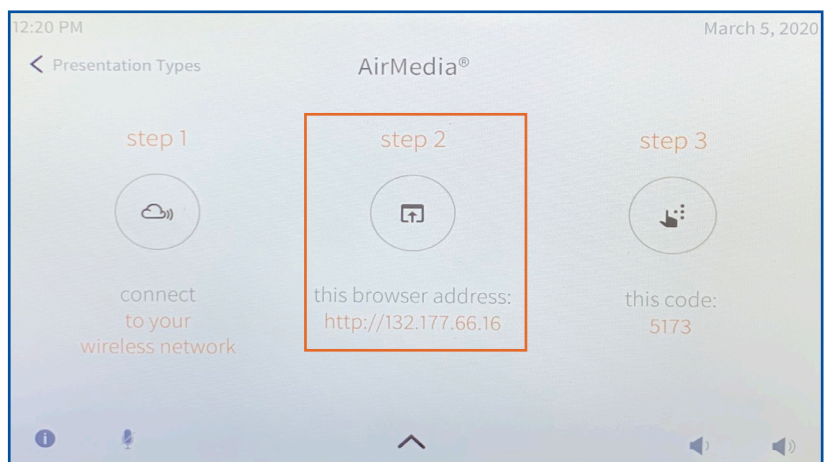

3. Download '*Crestron AirMedia*'®

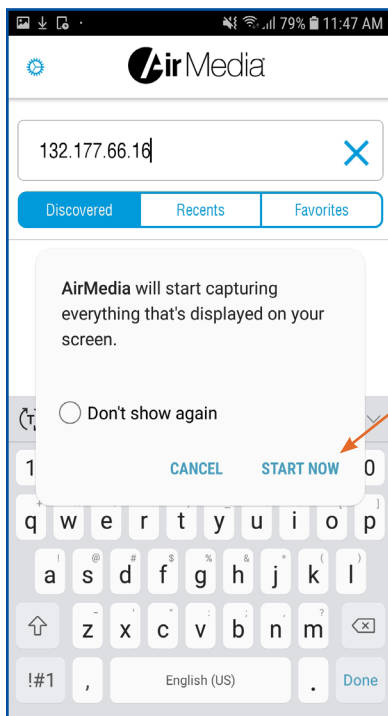

4. Accept both sets of terms and conditions by selecting the check boxes and then pressing 'AGREE'

5. Open Crestron AirMedia Application and enter the URL (*browser address*) provided on the touch panel and flat panel displays. Then select 'Present with AirMedia®'

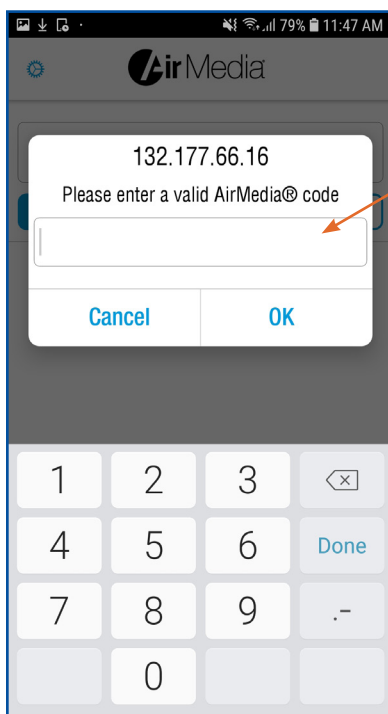

6. A permission box will appear letting you know that 'AirMedia will start capturing everything displayed on your screen'.

Select 'Don't show again'

Press 'Start Now'

7. Dialog box will prompt you for 4 digit code provided on touch panel and/or flat screen display.

8. You should now be connected via wireless through your Android device

**AV Tech Tip:** At this time AirMedia® does not support sound/volume controls through Android devices, please keep this in mind while presenting with these products.
