

Paul SuperTEC Zoom or Lecture Capture - Camera/Mic Selection Steps

1. Go to the Camera Icon located on the AV Touch Panel Source Selection Bar. (note this room has 2 touch panels, you may use either)
2. Choose the Camera Angle: Full Table, Furthest Half, or Focused on far end of table.
3. Next select your Source: Built in PC, or Personal Laptop (connected via HDMI and the USB cable(s) located in the conference table).
4. Select your display mode: Audio only or Audiovisual, and be sure camera box is checked. If the camera box is **NOT** checked off, use your finger to select the camera box. See orange box on screen shot below:

5. For Zoom: Use the ^ to select the **Blackmagic Web Presenter** Camera and Microphone
6. For Lecture Capture: Select the **Blackmagic Web Presenter** Camera and Microphone
7. You should now be connected to the room camera and microphone.

Camera Modes and Angles

For camera use you must be sure the Camera check box is selected on your source subpage. You can select the camera on the touch panel first, then go back to your display source or check off the camera button in your source selection.

Choose the camera application mode, then select your source. (HDMI / PC).

You will need to select the **Blackmagic Web Presenter** Camera and Microphone within the Zoom application.

- Full Conference Table

- Displays furthest half of conference table

- Focuses on far end of the conference table

You can change the camera's pan and tilt by tapping within the camera source screen.

Zoom In

Zoom Out

Mic: Blackmagic Web Presenter

Speaker: Crestron (Intel(R) Display Audio
