Welcome

Kennesaw State University’s Department of Statistics and Analytical Sciences will hold its tenth annual “KSU SAS Day” to celebrate undergraduate and graduate statistics students’ work in SAS. This event will feature poster presentations of students’ SAS-based research and guest speakers discussing analytics and the use of SAS in their organizations. SAS Day this year is sponsored by The Southern Company, SAS Institute, Inc., and Equifax.

KSU SAS Day will introduce our students to regional SAS users, allow them to begin building their professional network, and give them a look at real-world careers available to them in analytics. Students will have the opportunity to discuss collaborative projects with local businesses. This event provides SAS users from across the region with an opportunity to meet students at all levels who are considering careers in advanced analytics.

This year’s event will be held on Friday, April 21st, 2017 on the Kennesaw Campus at the KSU Center. The KSU Center is located at 3333 Busbee Drive NW, Kennesaw, GA 30144. The morning will begin with a continental breakfast and hot beverage service at 8:00 am.
