CAMPUS RESOURCES FOR ACADEMIC SUPPORT

Everyone, at some point in college, feels challenged by a course. Luckily, there is a lot of support available for those who look for it. Here are some steps you can take to find the help you need.

- The best place to seek help first is with your professor of the course. Visit the professor’s office hours (usually announced in the first class, published on the course syllabus, or available on Canvas), or schedule an appointment. Discuss your experience in the course, how you are studying, and options for improving your understanding of the material.

- If the course has a teaching assistant (commonly referred to as the TA), identify where and when you can get help from the TA. The TA is a good resource for help because they have usually taken the class and know the professor well.

- When you meet with your professor or TA go prepared with specific questions about course content that you don’t understand.

- Talk to other people in the course. Try to find a study partner or get a group of students together to study on a regular basis.

- Often students around campus offer tutoring on a private, fee basis. You can find advertisements offering tutoring services. Look for postings in and around the department of the course you’re seeking help in. (If you don’t know the location of the office, you can find it on the UNH website).

- You can post your own “tutor wanted” advertisement. Take your advertisement to the department office and ask if there is a place you can post it. Also ask the Administrator if they know of anyone in the major or in a graduate program in the department who offers tutoring. If you hire a peer tutor, expect to pay around $15-$50/hour for their services.

- For additional academic support, connect with a CFAR Educational Counselor via email: cfar.sss@unh.edu or via Chat now at: https://www.unh.edu/cfar or by stopping in at Smith Hall, Room 201.

There are many other resources on campus for receiving help in a course, including some free tutoring resources. On the back of this handout you’ll find a list of some campus resources that are currently available for the semester.
