## Weekly Trend Information

\*Other/Contractor also includes former (non current) students and employees.

Dashboard includes cumulative test results reported by ConvenientMD, Quest Diagnostics and UNH Lab starting 7/29/2020 that have been conducted through midnight of the previous day. Data received as of 11/06/2020 7:00 am.

### Important Notes:

- Data are presented according to the date tests are administered. Counts for most recent dates may be incomplete, but will be updated as results are reported.
- Active Cases include UNH students, faculty, staff and contractors reported from all sources, including those outside of the UNH testing program.
- Isolation keeps someone who is sick or tested positive for COVID-19 without symptoms away from others.  
<https://www.cdc.gov/coronavirus/2019-ncov/downloads/COVID-19-Quarantine-vs-Isolation.pdf>
- Quarantine refers to the practice of separating individuals who have had close contact with someone with COVID-19 to determine whether they develop symptoms or test positive for the disease. Quarantine also reduces the risk of transmission if an individual is later found to have COVID-19. Quarantine for COVID-19 should last for a period of 14 days after the exposure has ended.
- A close contact is defined as any individual who was within 6 feet of an infected person for at least 10-15 minutes starting from 2 days before illness onset (or, for asymptomatic patients, 2 days prior to positive specimen collection) until the time the patient is isolated.
- Average Daily Total Tests is the average of all tests conducted in the last seven days, including those with a positive, negative, inconclusive or pending status.
- Total Results represents the count of tests with a result of positive or negative.
- Positivity rate is the percentage of positive tests in relation to the total resulted tests. (Note: Students are routinely tested multiple times per week as part of the University's testing protocol).
- Prevalence is the percentage of positive tests in relation to the testing population.
- Cumulative data reflects UNH's initiation of protocols starting in late July for regular screening through COVID-19 testing. See details of the testing program at <https://www.unh.edu/coronavirus/covid-testing>
