Code.org Computer Science Fundamentals Professional Development for K-5 educators

University of New Hampshire is a Regional Partner of Code.org!

Computer Science Fundamentals:
Code.org Computer Science Fundamentals courses have about 15 lessons that may be implemented as one unit or over the course of a semester. Students create computer programs that will help them learn to collaborate with others, develop problem-solving skills, and persist through difficult tasks. They will study programming concepts, computational thinking, digital citizenship, and develop interactive games or stories they can share. Training is offered at no cost to K-5 educators who commit to teaching the curriculum.

Upcoming trainings
November 10, 2018, 9:00 a.m.-5:00 p.m.
University of New Hampshire School of Law
2 White Street, Concord  REGISTER
