The UNH-IOL: Improving Networks Worldwide
Since 1988, the University of New Hampshire InterOperability Laboratory (UNH-IOL) has partnered with Universities, commercial companies, non-profit organizations and government agencies in order to provide quality assurance by testing and fine-tuning technologies, as well as offering valuable knowledge base for student engineers. The UNH-IOL is committed to keeping pace with the evolution of communications technology. The laboratory is constantly in collaboration with different industries all over the world to develop test methodologies that would help to validate new equipment and protocols.

Our Mission:
To establish the UNH-IOL as the premier venue for fostering multi-vendor interoperability and conformance to data communications and networking standards while preparing students for successful careers in leading-edge technologies.

Training Tomorrow's Engineers
The UNH-IOL is the only full-scale, non-profit test lab in the world that partners with commercial industry in order to provide real-world training of future engineers. More than 100 graduate and undergraduate student employees work with full-time UNH-IOL staff, gaining hands-on experience with developing technologies and products. Over 300 companies and organizations work alongside students and gain benefit from cost-effective testing services, as well as the opportunity to recruit future engineers.

High School Summer Internship Program
A unique program, geared for students entering their senior year of high school, designed to engage students in the rapidly expanding global networking and data-communications industry. Summer interns will be exposed to computer science and electrical computer engineering programs at UNH.

UNH Tech Camp
In collaboration with the College of Engineering and Physical Sciences, private companies and the UNH-IOL offers an interdisciplinary engineering and computer science day camp designed for middle and high school students.
