TRANSPORTATION — Dirk Timmons

Out of the Gate

A quiet corner of a quiet Campus Connector route has recently undergone a significant change that exemplifies a lot of planning, cooperation, and hard work to achieve significant service efficiency. The Mast Road Connector reaches between the campus core and the Mast Road parking lots, Equine Center, and Child Study & Development Center. For many years a permanent gate was there for a reason, so it took some negotiating to assure town, resident, and Equestrian program neighbors that access would be limited, and any disruption negligible. A new remote-controlled gate was installed in August. This access was shared with Durham Emergency Services as well as the public school buses.

Today, access through the gate and changes to the campus core portion will allow over 21,000 miles annually and several minutes per trip. Avoiding the difficult left turn at Mast Road and Main Street saves time and more importantly makes the route considerably safer. The improvement to the per-loop time allowed UTS to provide service using one bus instead of two. Overall updates including the new gate stand to save UTS up to $103,800 per year—and essentially saved the route from elimination. ~ Submitted by Marc Laberte.

Best wishes to long-time driver trainer, co-supervisor and safety expert Josh Hughes who started a new career in outdoor education at the Cooperative Middle School in Stratham. Hundreds of UTS drivers learned under, Josh's training. You may still see Josh driving a bus now and then. Moving up into a full-time training role is also recently added, a long-time driver and assistant trainer. Congrats!

UNH Can Help You Quit Smoking - Free Quit Kits Available at the UNH Pharmacy

UNH Quit Kits contain educational information and tools to help you stop your use of tobacco products. You will be most successful in kicking your tobacco habit when you have support and utilize multiple measures rather than using only one. For example, some people use a nicotine replacement product along with meditation and counseling. The good news is, UNH offers many services to help:

• Quit Kits—FREE
• Biofeedback—FREE
• Meditation—FREE
• Light Therapy for the Winter Blues—FREE
• Get a Health Consultation with a health care provider by calling 603-862-4584

Health Benefits of Quitting:

• 20 MINUTES after quitting your heart rate drops
• 12 HOURS after quitting carbon monoxide levels in your blood drop to normal
• 2-3 WEEKS after quitting your heart attack risk drops lung function begins to improve
• 1-9 MONTHS after quitting your coughing and shortness of breath decreases
• 1 YEAR after quitting your risk of disease is cut in half compared to smokers

QUIT KITS

LONG TERM HEALTH EFFECTS after quitting also include decreased risk of lung cancer, decreased risk of heart disease, breathing problems and stomach ulcers

As of the writing of this article, meal plan sales are at 10,775 just 136 plans shy of an all-time high. The Student Life Department is coordinating the transition of meal plans to the new campus core and the Mast Road parking lots, Equine Center, and Child Study & Development Center. For many years a permanent gate was there for a reason, so it took some negotiating to assure town, resident, and Equestrian program neighbors that access would be limited, and any disruption negligible. A new remote-controlled gate was installed in August. This access was shared with Durham Emergency Services as well as the public school buses.

Today, access through the gate and gates to the campus core portion will allow over 21,000 miles annually and several minutes per trip. Avoiding the difficult left turn at Mast Road and Main Street saves time and more importantly makes the route considerably safer. The improvement to the per-loop time allowed UTS to provide service using one bus instead of two. Overall updates including the new gate stand to save UTS up to $103,800 per year—and essentially saved the route from elimination. ~ Submitted by Marc Laberte.

Best wishes to long-time driver trainer, co-supervisor and safety expert Josh Hughes who started a new career in outdoor education at the Cooperative Middle School in Stratham. Hundreds of UTS drivers learned under, Josh's training. You may still see Josh driving a bus now and then. Moving up into a full-time training role is also recently added, a long-time driver and assistant trainer. Congrats!

From the Desk of David May

It is my favorite time of the year. The nights are getting cooler. The heat of the day has subsided. But most importantly, our students are back. Such an exciting time. The work we do is so important to the experience students get at UNH. We are all part of a wonderful TEAM - Team Energy Accomplishes Most.

We have so much going on, it’s hard to know where to start. We are in the middle of significant construction projects—Campus Recreation Expansion, Outdoor Pool and Holloway Commons. All three projects will enhance the experience for the students and the campus community.

At this writing, Dining had a week where they served almost 100,000 meals. The Retail, Café and Restaurant team got out of the gate fast with sales already ahead of last year’s pace. Our Printing and Mail Services team is in the midst of supplying 2,000 course packs to students. Although the weather did not cooperate, Campus Rec had a very successful Fall Fest. It was a great opportunity to learn about everything they have to offer. The MUB held numerous programs and hosted Hillary Clinton and then Bernie Sanders was at the Field House 2 days later. The Housing team welcomed a record freshman class which resulted in a record occupancy level in the residence halls. The busses are running full steam ahead moving record numbers around campuses. Our Conference and Catering team is in full swing getting ready for some important events at the end of the month. Since August Support Services processed over 3,500 student ID’s, and almost 2,000 EPAFS in which 1,400 were new hires. Let’s not forget our BSC. They assisted the USNH Controller’s Office with their FY2015 annual audit and processed many, many invoices so our vendors get paid. And finally, our HR Partners are getting ready to facilitate another Leadership Forum starting in October.

Thanks for all that you do each and every day to make the campus a great place for students to be. I look forward to visiting with you soon.

Sincerely,

David
Our Amazing MUB Student Employees

What were the package numbers? On Tuesday, Sept. 7th GSS delivered 1200 new packages and delivered 2500 at the window, and on Wednesday, Sept 8th 1800 new packages were received and 3000 packages were delivered at the window. Amazingly enough these students had everything processed and email notices went out in less than 24 hours every day that week. Several additional student employees from other areas in the MUB worked extra hours to help with the overrun of packages. Shifts were added until 10PM, and Saturday and Sunday to keep up with the numbers.

Although GSS seems like the busiest place in the MUB right now, various programs sponsored by the MUB & Student Activities this fall have had outstanding attendance. Starting with Duke Box, the traditional opening night program, we hosted several thousand new and returning students. They joined us for activities, give a ways and demonstrations by student organizations. Every member of our student staff kept the MUB hopping and set ups flipping. Imagine every room in the MUB in use and having every table and chair moved at least once.

The MUB as a facility is incredibly busy due to our successful programming and service efforts. Thanks to these amazing student employees we had a great opening.

This summer was filled with major projects for Campus Recreation. Here’s a summary:

FACILITY PROJECTS — HRC (Hamel Recreation Center) Expansion/Renovation Project — significant progress was made on the foundation for the expansion this summer. This included over 300 steel piles that totaled over 10,000 feet of steel. Soon you will see the steel frame of the building along with the drainage system for the pool being installed. For more information go to: https://campusrec.unh.edu/new.

Whittmore Center Arena — several projects took place this summer. The most significant were the new video board and chillier replacement.

Mendonas Pond — currently undergoing emergency repair to the dam. To do the work, NH DES will be lowering the water level by 20 feet. This decreases the size of the pond from 300 acres to about 100 acres. Staff is working with DES and Facilities to determine if and how we can use the pond during the repair, which could take up to two years.

Tennis Courts — the number of courts has been reduced from 12 to 6 to accommodate the Stadium project for Athletics.

PERSONNEL UPDATES — Jennifer Malone joined the team as our Aquatics Coordinator. She brings many years of experience working with aquatics programs in the YMCA setting.

Kayode (Kay) Lewis is the first to serve as Youth and Instructional Programs Coordinator. His responsibilities include Camp Wildcat and developing an instructional program for students. Kay has been working in a similar role with municipal recreation.

Welcome back everyone! It seems that summer is going by quicker and quicker each and every year. It was a busy summer for the Conferences and Catering team, along with our colleagues in Housing and Dining. We hosted a wide variety of summer groups from very different backgrounds, ranging from athletic camps to animal control officers meeting to an international scientific conference (and that’s just one name a few!). The logistics team did a fabulous job coordinating all of the details for these large groups, and we received rave reviews from attendees looking forward to returning to UNH in the future.

In addition to the many summer groups that have been keeping us busy, there has been a number of exciting people we’ve hired this summer...Kemp received a promotion to a Catering Supervisor position (congratulations Gina!); a well -deserved one at that. We are thrilled to have Liz Fabale from Dining join our team. Her main focus will be providing exceptional service to our events in Holloway Commons. Martha Demers from Stuills has also become a member of our team and will be doing a variety of things in our Holloway and Huddleston facilities. And last but not least, we recently welcomed Kristin Cullif to the university, as an office assistant that will be supporting both Conferences and Catering and groups for the Dining operation.

Melissa Chase, Sales and Marketing Manager, has been hard at work marketing our campus facilities to prospective groups and booked two large conference for summer of 2016 and 2017, with more in the pipeline for the next few summers. We continue to be passionate and dedicated to growing the summer conference business as so many departments on campus benefit from hosting these groups. In addition to the revenue generated, the exposure that the university gets by welcoming thousands of attendees to campus during the summer months is invaluable. We often hear from students (and their parents) that they first fell in love with the UNH campus when they visited for a summer camp or conference.

The kitchen staff is getting creative and working on some fun new recipes. Coming soon to a meeting near you: make-your-own S’mores, Shortcake Sliders, and Popcorn stations just to name a few!

Our team is gearing up for a very busy fall season of events. We hosted the Foundation Board, the Evening of Distinction, and the Family Weekend picnic... these are some of our favorite annual events to be part of. Before we know it, we’ll be getting ready for the holiday event season. Until then, enjoy the beautiful weather while you can. Happy Fall!
What do refrigerators, LARGE flat screen TVs, bicycles, free weights for exercise and dozens of rugs have in common? Along with thousands of textbooks, they are all items that have been shown up at the Granite Square Station student mailroom to be delivered to our students this fall. This service is run by some of the 120+ student employees. Granite Square Station & Shipping are always extremely busy parts of the MUB - over 121,000 packages were delivered last year. However at the beginning of the semester the sheer volume of packages is overwhelming and jaw dropping. For example, on the Tuesday after Labor Day, the Durham post office and UPS dropped off 2 early deliveries by 10AM of ‘left over’ packages that could’ve been delivered earlier because of the holiday. That was followed by our regular deliveries of 5 more trucks by USPS, another full large truck from UPS and several more deliveries by FedEx and other carriers.

MEMORIAL UNION BUILDING & STUDENT ACTIVITIES — Mary Anne Lustigraff

HAZARD CENTER’S WEEKLY REPORT

Wednesday, October 14th 6:00 AM - 1:00 PM
19 West Edge - DRA
Other dates on Campus TBA

CAMPUS REC FREQUENTLY ASKED QUESTIONS

What do your responsibilities include?

- Coordinate and schedule events in the Hazard Center
- Serve as the student assistant to the Director of Campus Recreation
- Assist with the daily operations and maintenance of the Hazard Center

What is your favorite part of your job?

- Working with students in a hands-on capacity, creating opportunities for leadership and personal growth

What do you enjoy most about working at the Hazard Center?

- The diversity of events and activities that take place here
- The opportunity to meet new people and build lasting relationships

What kind of events do you coordinate?

- Academic events, such as lecture series and workshops
- Social events, such as parties and receptions
- Cultural events, such as performances and exhibits

What advice do you have for someone interested in pursuing a career in the events and activities field?

- Pursue a degree or certification in event planning or related field
- Gain experience through internships or volunteering
- Network with professionals in the industry

We welcome your questions and feedback. Please feel free to reach out to me with any comments or suggestions.
TRANSPORTATION — Dirk Timmons

Out of the Gate

A quiet corner of a quiet Campus Connector route has recently undergone a significant change that exemplifies a lot of planning, cooperation, and hard work to achieve significant service efficiency. The Mast Road Connector reaches between the campus core and the Mast Road parking lots, Equine Center, and Child Study & Development Center. For many years a permanent gate across the town portion of Mast Road near the intersection with North Drive prevented through traffic. For UTs, the gate represented a considerable detour for accessing a vital part of campus. A Route Productivity Review concluded that given timing and safety considerations, traveling all the way around the Mast Road gate, was potentially too inefficient to continue operating.

Yet rather than simply stopping service, UTs and its partners worked to find ways to streamline this route. Access through the Mast Road gate was essential. Obviously, the gate was there for a reason, so it took some negotiating to assure town, resident, and Equestrian program neighbors that access would be limited, and any disruption negligible. A new remote-controlled gate was installed in August. This access was shared with Durham Emergency Services as well as the public school buses.

Today, access through the gate and changes to the campus core portion will avoid cut 21,000 miles annually and several minutes per trip. Avoiding the difficult left turn at Mast Road and Main Street saves time and more importantly makes the route considerably safer. The improvement to the pre-loop time allowed UTs to provide service using one bus instead of two. Overall, updates including the new gate stand to save up to $103,800 per year… and essentially saved the route from elimination. ~ Submitted by Marc Laliberte.

Best wishes to long-time driver trainer-coordinator and safety expert Josh Hughes who started a new career in outdoor education at the Cooperative Middle School in Stratham. Hundreds of UTs drivers learned under, Josh’s training. You may still see Joshi driving a bus now and then. Moving up into a full-time training role is Josh’s long-time driver and assistant trainer. Congrats.

UNH Can Help You Quit Smoking — Free Quit Kits Available at the UNH Pharmacy

UNH Quit Kits contain educational information and tools to help you stop your use of tobacco products. You will be most successful in kicking your tobacco habit when you have support and utilize multiple measures rather than using only one. For example, some people use a nicotine replacement product along with meditation and counseling. The good news is, UNH offers many services to help:

Quit Kits—FREE. Biofeedback—FREE. Meditation—FREE. Light Therapy for the Winter Blues—FREE. Get a Health Consultation with a health care provider by calling 603-862-4584.

Health Benefits of Quitting:

20 MINUTES after quitting your heart rate drops
12 HOURS after quitting carbon monoxide levels in your blood drop to normal
2-3 WEEKS after quitting your heart attack risk drops; lung function begins to improve
1-9 MONTHS after quitting your coughing and shortness of breath decreases
1 YEAR after quitting your risk of disease is cut in half compared to smokers
LONG TERM HEALTH EFFECTS after quitting also include decreased risk of lung cancer, gum disease, breathing problems and stomach ulcers

Quit for Life Mobile App:

UNH Dinning Launches two new important strategic initiatives: Menus of Change and Take Less Waste Less. Both initiatives share a common mission of altering behaviors for the betterment of the larger population. UNH is 1 of 27 universities in the country driving Menus of Change—24 principles that advocate healthier food choices through purposeful selections with smaller portions of unprocessed ingredients, seasonal items, moderation of sugars, salt and red meat, more plants-based entrees and a decreased environmental impact. We added exciting new items with the Menus of Change in mind—local beef sliders created with a 50% mushroom blend at stillings, a new Dim Sum bar at philbrook; incorporated ancient grain and bean based entrees in our Mediterranean Farro Salad; increased fresh fish from the Boston fishing Pier (featured almost daily) and发明ed house-made dressings and sauces. We have new pre-portioned with portion of the MUB, they all are available at the UNH Campus Dining. They are to help the people make a change to be healthier. We are looking for a healthy change and we want to help the people make a change to a healthier lifestyle.

Health Benefits of Quitting:

The Take Less, Waste Less or #TLWL campaign originated from UNH Dinning and Student Senate’s collaboration efforts to reduce food waste within the dining halls and is also supported by the Sustainability Institute. By drawing attention to the large amount of food selected by guests but not consumed, this initiative not only improves the environmental and financial impact of waste. Awareness is rapidly growing across numerous institutional levels.

Food Waste Studies will tally all of the leftover food from guests plates. Staff reminders will be placed at each serving station to Take Less, Waste Less. The impact of the initiative is that the less we throw in the trash to the campus and the food that is thrown away is also released to a consumer food pulp collected throughout the year in the dining halls.

From the Desk of David May
