To all those whom it concerns,

The Student Senate of the University of New Hampshire recently voted to pass a resolution recommending the conversion of all single-occupancy restrooms at UNH to gender-inclusive restrooms. The resolution also recommends that all future constructions at UNH follow this rule as well. The Student Senate has made this recommendation after serious consideration of “a variety of mediums” such as the Campus Strategic Plan which “expresses a desire to be an inclusive community.” Additionally, the senate recognized that there are currently only 20 designated gender neutral restrooms but many more that are single-occupancy. The Student Senate feels extremely strongly that all of these factors make this recommendation a feasible and important solution.

Respectfully,
Gabriel Hoffman
Speaker of the University of New Hampshire Student Senate
