Colleges and
Universities

As schools and communities address concerns over the health and well-being of student populations, the job prospects for teachers (including health and physical education teachers) ranges from good to excellent. Overall growth in the field will be impacted by enrollment rates and a significant number of anticipated retirements between 2014 and 2024.

A dual teaching certification in health and physical education, with skills in adapted physical education, provides a greater number of career opportunities.
