What Will Be A Challenge?

- Maintaining Workflow – Getting in the Habit of Asking Applicants to Summarize and Refine
- Scale? Is it useful if accounting tool is based on coarser data (e.g. septic)
- Land Converted to Grass
- Land Converted to Agriculture Fields
- Any of the EPA List if under threshold for site plan or building permit application
  - Recommended tracking these via aerial imagery acquisition in periodic intervals – Hopefully shared effort among communities/regional planning
