RECENT THEORETICAL AND RESEARCH PROGRAMS

VIEWING PERSONALITY AS A SYSTEM

I view personality as a system, and the discipline of personality psychology as focused on understanding four topics related to it: defining what personality is, describing the parts of personality, outlining personality's organization, and characterizing how personality develops. I refer to this approach as the *personality systems framework* and I've written that the framework provides a useful integration for the field of personality psychology. In 2005, I wrote an article describing the framework in the *American Psychologist* (2005). Since then, I have been invited to write articles on the framework for the journal *Social and Personality Compass* (2011), as well as for special issues of the journal the *Review of General Psychology* (2013) and the *Journal of Research in Personality* (2015).

STRUCTURAL MODELS OF PERSONALITY

A good first view of personality, according to the *personality systems framework*, is at the level of its organization, specifically its long-term stable connections to neighboring systems, and its internally-functioning systems (technically, personality's structural organization). Personality connects to such neighboring systems as the brain, the social setting, situations, and groups. The personality system further includes internal areas that carry out its major functions: personality's energy development, knowledge guidance, self-management, and action planning. This structural organization of personality is described in a number of articles (e.g., Mayer, 2003; 2005; 2015).

EMOTIONAL AND PERSONAL INTELLIGENCES

I am particularly interested in the intelligences that personality draws on to function. Much 20th century research examined “cool” or cognitive intelligences. I am very interested in “hot” intelligences – those that deal with personalized, ego-relevant information. In 1990, Peter Salovey and I claimed that there existed an as-of-then unmeasured intelligence, *emotional intelligence*, which functioned alongside verbal/crystalized and spatial/fluid intelligence. Since that time, I developed measures of emotional intelligence with Dr. Salovey, Dr. David Caruso and other colleagues.

More recently, I suggested that there also exists a somewhat broader *personal intelligence*. Personal intelligence involves the abilities to reason about personality and personality-related information. I featured the theory in a 2014 book *Personal intelligence: The power of personality and how it shapes our lives* (Scientific American/Farrar, Straus & Giroux), and am developing tests that measure personal intelligence and what it predicts.

1. mypages.unh.edu/jdmayer. That site, which was begun on July 13th, 2017, has seen 92,000 unique users so far according to Google Analytics, with 112,000 page views. The number of visitors is now about 200 visitors per day over the past month, during the workweek. No information on downloads is available, but see the next site.

2. scholars.unh.edu/personality_lab. This is a collection of 59 papers and other reports from the laboratory. For the week of May 3rd, 2021, there were 409 downloads of papers (57 per day), and 65,410 downloads of articles, data sets, technical reports, and the like since the inception of the site.

VII. WEB BLOG

Mayer, J. D. (November 25th, 2013; also three years before that from August 24th, 2008 to June 15th, 2011). The Personality Analyst. *Psychology Today Blogs*. As of May 8th, 2014, I had posted 141 entries on the blog and attracted 490,128 page views.

URL: <http://www.psychologytoday.com/blog/the-personality-analyst>

The Personality Analyst is now indexed in the *ACI Scholarly Blog Index* and is available through OCLC WorldCat and ProQuest Summon. See <http://scholar.acindex.com/>

The *Personality Analyst* blog explores ideas related to the topics of personal intelligence and personality psychology more generally. Recent subjects include (a) personal intelligence, (b)

judging others, and (c) personality psychology in general. Recently, the column has appeared weekly or every two weeks on Tuesday evenings. Each post is approximately 500-1000 words in length, with scholarly notes listed at the conclusion. The five most widely read posts are:

"How high is your personal intelligence?" 2014, April 22nd

"Three levels of knowing a person" 2014, November 8th

"What emotional intelligence is and is not" 2011, September 21st

"Does culture influence how we judge personality?" 2009, April 5th

"Why did people change in the axial age?" 2009, June 15th, 2009
